Evaluate Investment Performance

Based on historical data of the index since 2010-01-01 (or inception date), backtest the investment results under the same valuation and drawdown levels from 2010-01-01 to T-1 year. Data last updated: 2024-10-19.

Risk tips

The specific index names, product names, stock names, codes, or technical charts involved in this feature are provided for knowledge introduction or operational demonstration purposes only and do not constitute investment advice for any securities. The information provided by this feature is based on historical data and does not represent future trends; it has certain limitations and does not constitute any form of investment consultation or advice. The content and functionality of this feature should not be used as the sole reference for investment decisions. Investors must make their own investment decisions independently and bear the associated risks.

Past performance of a fund does not indicate its future performance. Investors are advised to carefully read the Fund Contract, Prospectus, and other related documents to fully understand the risk-return characteristics of the fund product, their risk tolerance, investment horizon, and investment objectives. Investors should make independent decisions and choose suitable fund products accordingly.
